

## **DEAR FELLOW NATURAL PERSON**

And:

To: The Honourable Minister and his Cabinet  
To: The Honourable Attorney General  
To: The distinguished Police Chiefs  
To: The Municipal Standards Director, To the Honourable Mayors  
And; The distinguished members of the AGCO

## **RE: ONTARIO LEGALIZATION OF CANNABIS**

We are the Lawful Cannabis Coalition, and; are natural persons and the private residents in Ontario. Some of us are in the business of supplying cannabis in edible, recreation and medicinal form, while; some of us consume and use Cannabis for a great number of reasons including as an alternative medicine and pain relief. Our purpose is to the Law, good will and the maximum benefit of all. As we are making a claim, we are aware that the onus lies on us to prove "right". Therefore, we attached an affidavit with this correspondence, that at the very least establishes a claim of right and by giving notice of such a claim places a duty upon you to verify or deny the factual basis of any claim or right hereunder.

## **Simplified points list**

1. We are the LC2.
2. We love our country... We are our country.
3. We are dedicated to lawful purposes.
4. We are looking for your participation and communication with this coalition.
5. We are not at all happy to be tabling this conversation and are disappointed that we have to.
6. We have prepared a brief background on what we have observed.
7. We know that there is a distinction between legal and lawful.
8. We know that no legal statute should trump the rights of a lawful natural person (sometimes referred to as a “human person”)
9. We also have observed that some people are using legal contract law to usurp our natural rights and create monopolies.
10. We purpose that the corrections are simple and only require common sense substitution.
11. The coalition will be ran by the membership with a team or standing committee dedicated to keeping it responsible, respectable or in other words “good”.
12. Our members will have share value and participate in its revenues
13. Municipalities do not have the right to punish a person before lawful conviction, property seizure and property closures infringe on established constitutional right, and is punishment before conviction and is

unlawful.

It is our object to unite the small operator and allow them to participate in the Cannabis market alongside Canada's now established monopolies, and the companies from the U.S are already positioned here in Canada to exploit Canadian dollars from the Canadian business, while; their Government punishes us at the border because we are in the Cannabis market. Canadians should not be turned back at the border while American Companies make currency from our residents.

### **Our Object**

- Previously owned Retail Operators to be grandfathered in and get licenses. Allow Micro growers to sell to the retail operators/coalition.
- Allow the retail operators to purchase directly from the LP not the OCS [we are not suggesting that the OCS cannot participate in the recreational market, but; their primary goal should be for the provision of the highest quality supply to institutions in the care of the “aging population”].
- Allow those with minor cannabis conviction to open retail operations or grow operations
  - We will Provide bulk purchasing opportunity for coalition members so they can be competitive against the large suppliers
  - Provide a Legal Team for Coalition Members to deal with and have long term representation in their interest
  - Provide insurance for Coalition Members and their staff

► **Our first goal**

1. To cease the unlawful raids on retail operators that have, and; are still waiting for reasonable terms for licensing and coming into compliance.
2. Publish the terms of lawful participation [as per our articles of incorporation and our membership agreement]
3. Publish the lawful participants of the membership [names of our membership so that we may fulfill the below]
4. Allow for searchable and traceable products
5. Allow for access to our research and data as collected by the membership for the benefit of the natural person and integrity of the cannabis market.

**The purpose of this document is to introduce you to the residents of Ontario, that you may not have known held this point of view, and; to have a clear treatise as to our intention, short and long term conduct in relation to the legalization of Cannabis in Ontario.**

For simple clarification; the members of the government and more specifically their departments are made up of people, and; these people that have been, and are tasked with writing the rules for legalization of the Cannabis Market, have willfully neglected our claims, and; in so doing we the natural persons and lawful residents of Ontario have observed that these members have betrayed our trust and instead legalized their ability to commit “extortion, coercion, price fixing, manipulating and monopoly of a market”...

at no time have “the people waiting to participate in the market try to conduct criminal acts or illicit dangerous business”, “stop using the media” and “name associations” to make it seem ok to extort us out of our rightful claim;

we trusted that the people charged with this task would have provide reasonable terms of compliance and licensing, and; instead of reasonableness, “which is a true condition of fact if there is to be any crime”, they have instead; pretended to be protecting children, while if observed under scrutiny the rules are not for safety, but; positioning to abscond all the revenue of the Cannabis market place, and; funnel it into the hands of preferred owners.

We therefore have “no confidence in this Government for allowing this, [and none of them have stood up for the rights of the natural people] and; we the natural person and residents of Ontario have been placed in a Position of non-confidence”, and; demand an immediate, independent investigation on this conspiracy as stated in the Competition Act, and; we seek immediate injunctive relief, and; task the police chief to protect us “the natural person” and residents, and; that the police chiefs not be complicit, or willfully negligent as “their purpose is to the public trust”, and not simply to take orders, but to stand on guard for Canada.

Please read the document served on you, which; has now placed you in a fiduciary duty.

We are forced to bring the below facts to the voters of Ontario

To the residents of Ontario, we know you think this legalization of Cannabis doesn't affect you, but it does;

If they can and do get away with the "shenanigans" they are doing they can and will do it with other things, and; this is a slippery slope to losing all that we love and swore to protect in our beloved Country.

The key problem is a select few are using the government to capture all the revenue from the Cannabis Market. How the government is going about taking all the "revenue currency" from this market is "unlawful", "Extortion" and a criminal offense; "Coercion", is criminal offense; "Price fixing", is a criminal offense; "Conspiracy to fix a market" or monopolize a market is unlawful, and;

using the police to shut down competition is criminal; using million dollar fines against a landlord to shut down competition is coercion, and; is criminal, and; In order for the government to compete in the existing Cannabis Market (which incidentally for more than 90 years they said was 'bad as legalizing murder', and; now want to completely control) they had to fix prices with the LP's, and; that is illegal, and further;

In order to stabilize their market afterward after fixing the prices they use the police to remove existing competitors, and; then introduce their selected retailers and rewarding a few citizens for falling in line with this regiment; this takes planning, cunning and greed.

The legal system which is a law of contracts was used unknowingly to the residents, to tailor the rules and bring about this monopoly, and consolidate it under the power of the OCS; ran by the Ontario Lottery and Gaming its handlers and their preferred owners, and; If they get away with it here they will never stop. "Canada stand on guard".

You must not allow your representatives to break the law, protect your future, protect your children's future, it is our duty to not allow the government to do illegal and unlawful things or substantively break the law for personal gain. Political corruption affects every Body.

Manipulating human rights affects us all.

if Slavery is prohibited in Canada and the Commonwealth; correct the provisions of the cannabis act or else it's a dangerous and slippery slope.

“We should at no time be made to fear our representative Government, or feel that we are enslaved, and if we are made to feel that way now, what do I have to look forward to? What do my children have to look forward to?”

We want a judge or the attorney general to tell us that there isn't a difference between legal systems and Common Law. We want them to tell us that there isn't a difference between a “person” in law and a “natural person” or “human person”

We have been waiting for licenses. We are not illicit or Criminal, we have a right to grow, sell and participate in the Cannabis market.

The government was wrong about Cannabis and they are wrong about how they are legalizing it... monopolies are not acceptable Ford, Mr. Trudeau, give us licenses.

Our police should not be used to extort us, and landlords for wanting to participate in legal Cannabis sale. We have a lawful claim. We demand licenses.

We are not criminals or gangsters; we are lawful natural person. We do not consent to a monopoly of the cannabis market. Don't gamble with our future.

Toronto police commissioners we want to respect your distinguished office but please, stop using the media to make it seem ok to extort us out of our claim. We have been waiting for licenses and asking for licenses, and; we demand lawful participation in this cannabis market.

Our Elected representatives should not be making war on us what they should be doing is find ways for us to participate. Do you think we elected you to raid us and seize our property... we have a lawful right to grow sell and participate in the Cannabis market. There should be no such thing as Cannabis raids

You call us illicit, you threaten us, raid us and terrorize us; we have been waiting for 4 years for a license You close our stores and then tell us our lives depend on a Lottario, a Draw, a game of chance, a roll of the dice this is unacceptable On Election Day we will put your name with 50 000 other names in a hat and pick our next premier and police chief Acceptable?

### **Unacceptable**

Do not gamble with our future Mr. Premier Our lives are not games of chance, roll of the dice or a lottery we believed you are competent...you were elected because you said you are for the people ... Canada has been wrong about Cannabis...honest hardworking people have been waiting for licenses and are being injured... we are only illegal because you won't give us licenses. Why don't you want us to participate in the Cannabis Market? It is our Right.

Mr. premier You have spent countless dollars on police task force Municipal Surveillance Social media advertising; your government has done everything to exclude us and nothing substantial to include us... grand fathered our licenses now.

we must not allow the government to do illegal things or substantively break the law...Political corruption affects every Body Manipulating human rights affects us all.

The members of the coalition will act according to the following basic standards

- 1.** All members will be acting under a claim of right
- 2.** All of their corporate property acting as corporations will be claiming the rights of a natural person.
- 3.** All leases are secured before hand
- 4.** All locations will have surveillance cameras
- 5.** All locations will have security guards
- 6.** All locations will use POS Systems
- 7.** All participants will be required to register to the member stores
- 8.** All member stores will be required to register and abide by the articles and membership agreements
- 9.** Participating members have contributed to standing fund for the purpose of insurance.
- 10.** We allow the smelling and looking at the products without restriction; if handling participants will be required to put on gloves
- 11.** We will carry on all reasonable normal business practices including advertising, display and informational data on all product offerings
- 12.** Excess product will be locked in secure location for robbery prevention
- 13.** We will be using controlled access door system
- 14.** No sale to anyone under 19 years of age
- 15.** Not keeping any record of Government identification.
- 16.** Member retailers will carry and offer “ingestible”, sometimes referred to as; “edibles”, based on production from commercial kitchens, best use labelling, nutritional facts, min and maximum dosage and warning labels.

- 17.** All member retailers will add the 13% HST to all sales and remunerated as regular business practice.
- 18.** We will not add Excise Tax
- 19.** Our bud tenders will not be required to be certified [CannSell]
- 20.** We will purchase our product from our members based on our membership agreement and standards for distributions.
- 21.** We track all our distribution
- 22.** All members must follow the Articles, membership agreement and responsible retailing rules, as well as good faith conduct within their operations, and; if this is not kept any such member can and will be delisted and removed from the membership.
